Cast Component: Device for a medical application.

Material: A356 aluminum.

Process: Rubber plastic molding.

Casting Supplier: A.L. Johnson Co., Camarillo, Calif.

- This casting served as a pre-diecasting prototype and first run production for this part.
- The customer was given its first casting production, which was a nearly identical match to what would be the die casting, with a leadtime of less than one month.
- The customer was able to prove out the design and have a supply of parts until it ultimately received the diecasting tooling.
